KRISH GARG

AI/ML Engineer • Full-Stack Developer • UI/UX Designer
+91 8375075158 • krish.garg2708@gmail.com • Delhi, India • GitHub • LinkedIn • Portfolio

PROFESSIONAL SUMMARY

2nd-year B.Tech CS student at Manav Rachna University (CGPA 7.05) with hands-on experience across AI/ML, full-stack development, and UI/UX design. Completed 5 internships, built 15+ projects spanning RAG systems, multi-agent AI, SaaS platforms, and production-grade UI. Smart India Hackathon 2025 Finalist with 14+ hackathon participations. Actively seeking internship roles in AI/ML, frontend development, and product design.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL
AI / ML: RAG Systems, LangChain, FAISS, OpenAI API, Google Gemini, NLP, Computer Vision, Minimax/Alpha-Beta
Frontend: React.js, TypeScript, Vite, Framer Motion, React Native, HTML, CSS, JavaScript, Tailwind CSS
Backend: Node.js, FastAPI, Flask, Express, WebSockets, REST APIs
Databases: MongoDB, FAISS (Vector DB), Neo4j, SQL, Firebase, Firestore
UI/UX & Design: Figma, Wireframing, Prototyping, User Research, Component Libraries
Tools & Platforms: Docker, Git, GitHub, Vercel, n8n, Streamlit, Jupyter Notebook

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern — Codsoft *Jun 2026 – Jul 2026*
- Built unbeatable Tic-Tac-Toe AI using Minimax algorithm with Alpha-Beta pruning, achieving perfect game-play at O(b^d/2) complexity reduction.
- Implemented Image Captioning system using CNN (VGG16) + LSTM encoder-decoder achieving BLEU-4 score of 0.28 on MSCOCO benchmark.
- Developed rule-based NLP chatbot with two-pass intent classification pipeline handling 50+ intents at 82% accuracy with zero API dependency.
- Built real-time Face Detection & Recognition pipeline using OpenCV and deep learning models for production-grade biometric use.

UI/UX Designer — CodeIt Tech Solution *May 2026 – Jul 2026*
- Designed end-to-end UI/UX for 2+ client-facing web products; built wireframes, user flows, and high-fidelity Figma prototypes delivered to dev handoff.

UI/UX Designer — Future Interns *May 2026 – Jul 2026*
- Delivered SmileCraft Dental, GlowUp Salon (mobile booking app), and NovaFlow CRM dashboard — full product design cycles from research to prototype.

UI/UX Designer — Skillcraft Technology *Jun 2026 – Jul 2026*
- Created high-fidelity UI designs and component libraries; delivered pixel-perfect design handoffs with detailed dev specifications.

UI/UX Designer — Oasis Infobyte *Apr 2026 – May 2026*
- Designed responsive UI screens and user flows; iterated based on feedback to improve usability and visual consistency.

TECHNICAL PROJECTS

DocuMind — RAG Intelligence System | React.js • FastAPI • LangChain • FAISS • OpenAI API
- Built end-to-end RAG pipeline with FAISS vector embeddings for semantic document querying; achieved 95% context-accuracy on test documents with multi-turn memory and source attribution.
- Reduced document information retrieval time from several minutes of manual search to under 3 seconds per query.

SmartClinic — Clinic Management SaaS | React • TypeScript • Node.js • MongoDB • Google Gemini • Twilio
- Full-stack SaaS for small Indian clinics: appointment scheduling, digital prescriptions, GST-compliant invoicing (5s vs 10–15 min manually), and AI health summaries via Gemini.
- Integrated Hindi/English bilingual support, WhatsApp/SMS reminders; estimated 35% reduction in front-desk workload per patient.

SmartKirana — Grocery SaaS (Live on Vercel) | React Native • Node.js • MongoDB • Google Gemini
- Mobile-first inventory & GST billing SaaS for Indian kirana stores; features AI demand forecasting, Udhaar Book credit tracking, Hindi/English support — deployed and live.

Disaster Response AI Agent | React.js • FastAPI • LangChain • Google Gemini • MongoDB
- Multi-agent AI system for real-time disaster severity scoring from images, video, and text; achieved 60% faster victim identification vs manual assessment in simulated scenarios.
- Designed priority-based resource allocation and automated alert generation for rescue team coordination.

Ambulance Priority Routing System | React Native • Node.js • FastAPI • MongoDB • Google Maps API

- Real-time emergency routing using Dijkstra + A* algorithms; dynamic traffic-aware rerouting and AI chatbot for hands-free paramedic guidance reduced simulated hospital arrival time by 25%.

SafeLink — AI Cybersecurity Analyzer | Python • Scikit-learn • Flask • React • VirusTotal API

- ML-powered phishing & malware URL/file scanner; detected 98% of zero-day phishing attempts in controlled testing using behavioral models — outperforming commercial URL scanners.

MedSimplify AI — Medical Report Explainer | Python • Google Gemini • Flask • React • OCR • PyMuPDF

- Multimodal AI that parses blood tests, MRI scans, and prescriptions; generates bilingual (English/Hindi) plain-language explanations with risk-level flags and suggested doctor questions.

SmartRuleBot — Rule-Based NLP Chatbot | Python • Flask • JavaScript • NLP

- Custom two-pass NLP pipeline (tokenization → intent → entity extraction); 50+ intents, 82% match accuracy, zero external API dependency, sub-100ms response latency.

EDUCATION

B.Tech in Computer Science & Engineering — Manav Rachna University *2024 – 2028 | CGPA: 7.05*

ACHIEVEMENTS & HACKATHONS

Selected highlights (14+ hackathons total):

- Finalist — Smart India Hackathon 2025 (National-Level Government Hackathon).
- Participant — NASA Space Apps Challenge, IIT Kanpur Hackathon, NSUT Hackathon (Hack4Delhi), India Innovates 2026 (Municipal Corporation of Delhi).
- Participant — DTU Neuro Knockout, IIT Hyderabad Code Clash, BITS Pilani Ai-Thon Global Coding Conquest, IIIT Allahabad Opencode'25, Gen AI Exchange Hackathon.
- Competitive coder — GDG, Unstop, and multiple IIT-hosted contests.
